MAGtool manual Appendix B 5 11 17 ap cmr JC cap cmr.docx
MAGtool manual Appendix B 5 24 17.docx

Thanks Anita – I was wondering about that! We generally tried to address all your comments, the few we did not gray out (marked as “Resolved”) we at least provided a response. Phil – if you review I would recommend looking at the “clean” version (5_24_17) and refer back to the marked up version if you have a question or to see our comments/previous edits. I have attached both here.

Thanks –

Colleen

Hi Colleen,

Just a heads up - I'm not going to have a chance to re-review this document. Phil – if you haven't already reviewed, perhaps you can complete the final review?

Thanks,

Anita

Hi Anita –

Attached is the revised write-up. There were pretty significant changes – I have attached the version in track changes. You may want to view it with “No Markup” since there have been so many edits but still be able to flip back to “All markup” to see all comments and edits. I have attached a clean version as well if that is easier to use.

We are happy to talk about any items that need discussing. I think we see a more comprehensive document being crafted for the overlap methodology, but since some things may change and the methods for incorporating the non-lower 48 need to be incorporated, that probably should wait a bit. At this time, we tried to refer back to the BE where possible and highlight areas that were revised/added for the MAGtool for the overlap analysis.

Thanks!

Colleen

See attached comments. Let me know if you'd like to discuss any of these further. Thanks.

Anita

Hi all –

I know Anita is working on comments on this right now. Other folks are not obligated to comment, but if you are, comments by end of the day Friday would be great.

Thanks!

Colleen

Hi everyone –

I got Jen's updates shortly after I sent that out last night and the updated version is attached. But if you had already started looking at the first one I sent, it is fine to use that one for comments.

Thanks again!

Colleen

Subject: MAGtool conceptual write-up

Hi all –

Attached is a draft of the conceptual model for the MAGtool that we were planning to provide to the Services for the BiOp (actually this is an excerpt from the larger manual for the MAGtool). Jen is still working on some language edits to the overlap section, but I can incorporate her changes with feedback I receive from others. It would be good to have Melissa and Kris review, but I think they are out of the office this week so I am not sure there will be time to incorporate.

Thanks for any and all feedback!

Colleen
